Press release

Bacula Enterprise Edition new in Univention App Center

Integrate the network enterprise backup solution Bacula Enterprise Edition in heterogeneous IT environments with just a few clicks
With the launch of Bacula Enterprise Edition there is now a professional enterprise solution for the backup and restoration of data in heterogeneous environments available in the Univention App Center. Users of the enterprise IT management solution Univention Corporate Server (UCS) can test the software with unlimited functions for 30 days and 5 jobs.

Bremen, Yverdon-les-Bains, 03.09.2014. The Univention App Center is a marketplace which offers a wide selection of software applications for business IT and for all the available components of the server operating system UCS, which is designed for the operation of large, heterogeneous IT environments. Thanks to the Univention App Center, the backup solution from Bacula Systems can now be installed with just a few clicks and integrated in UCS' central computer and service administration. Bacula Enterprise Edition offers modern, highly scalable backup and restoration management functions for enterprises. It allows the backup and restoration of data from different clients, irrespective of whether they are Windows, Apple or Linux computers.

"Backup is an important topic in the field of infrastructure operation, as continuous enquiries from our customer and partner network show. With Bacula Enterprise Edition, the range of backup solutions in the App Center has now been complemented with an established, professional and internationally renowned solution. As such, users can now always find the perfect backup solution for their requirements in the Univention App Center", said Peter Ganten, CEO of the leading European provider of Open Source products for the cost-effective operation of IT infrastructures, Univention.

"Univention customers were anxiously hoping to be able to use the simplicity, the reliability

and the scalability of Bacula Enterprise Edition. Thanks to this partnership between Univention and Bacula Systems, they finally can integrate a Network Enterprise Backup & Restore solution into their UCS environment!", said Aristide Caraccio, VP Sales & Marketing at Bacula Systems.

With Bacula Enterprise Edition UCS now offers another backup solution tried and tested in companies as standard. UCS users can test the software with unlimited functions for 30 days and for 5 jobs. This version can be downloaded and tested at: http://www.univention.com/products/ucs/univention-app-center/app/details/bacula . Bacula Systems also offers interested parties commercial licenses and comprehensive support and maintenance options. About Univention

Univention is a leading supplier of Open Source products for the operation and management of IT infrastructures. The core product is Univention Corporate Server (UCS), a flexible, cost-efficient and successful alternative to server solutions from Microsoft. UCS contains comprehensive Active Directory functions and an App Center via which enterprise applications can be integrated and operated.

UCS allows web-based IT management and can be employed in organisations of all shapes and sizes. The product can be used as a classic server solution, on the cloud or for hybrid IT environments. It can be operated as a component for existing Microsoft infrastructures and supports the simple replacement of Microsoft Windows domains.

Univention has a global partner network and subsidiaries across Europe and North America.
